-Mathematical thinking.
-Data structure, database manipulation and nodes theory,

2021-2022

WORKING EXPERIENCE

Inventory Database Supervisor

Alisa Hardware Store

April 2019 - December 2022

I provided personalized attention to customers and my co-workers.

Managed a team of three to implement improvements to the internal and external customer experience.

Designed new methods for merchandise storage, information and inventory.

I acquired soft skills such as perseverance, resilience, assertive communication and teamworking.

PERSONAL PROJECTS
Pokedex Web App

pokedex.gael.codes

I developed the frontend for a web app that consumes an API called "Pokeapi" that shows in an organized way the names, types, abilities, colors and much more about the pokemons.

This app can be easily scalated to another topic, for example an e-commerce.

Uses technologies such as React, HTML, CSS, React Router, Git, Web Deployment, API REST consumption and responsive design.
